**Tags:** Party in Paris, breaking the food chain, Turnbull and Bishop in Paris, climate change.

## **The 21<sup>st</sup> Birthday Party in Paris - It's Time they Grew Up**

Global Warming Alarmists are about to gather in Paris for the biggest climate carnival in their 21 year history – they hoped to see 25,000 official guests and 15,000 hangers on. Surely on their 21<sup>st</sup> birthday it is time they grew up and faced some adult world problems.

Any urchin on the streets of Paris today could tell buffoons like Ban Ki-moon and Barack Obama that the "biggest security threat facing the world today" is NOT a miniscule increase in atmospheric plant food, caused mainly by gentle natural global warming which has triggered minor expulsion of carbon dioxide from the oceans.

**Obama and his side kick Kerry call climate change the biggest threat to national security:**  
<http://www.breitbart.com/big-government/2015/05/20/obama-to-coast-guard-grads-climate-change-the-biggest-threat-to-national-security/>

<http://legalinsurrection.com/2015/11/john-kerry-insists-climate-change-is-national-security-threat/>

**But the US Congress is not supporting the Paris party:**  
<http://joannenova.com.au/2015/11/the-one-most-important-factor-for-paris-the-us-congress/>

Turnbull and Co should not insult Parisians by taking part in such frivolous folly.

## **More on the UN Folly in Paris**

Radical Islamist terrorists just maimed and murdered hundreds of people in Paris, dozens more in Mali, still more in other nations. They promise more atrocities in the United States and around the globe.

Meanwhile some 40,000 bureaucrats, politicians, scientists, lobbyists, activists and journalists plan to enjoy five-star Parisian hotels and restaurants, while attending

COP21, the twenty-first UN Climate Change Conference, from November 30 through December 11. Like President Obama, they insist that humanity faces no greater threat than climate change. Some are even saying that ISIS attacked Paris to disrupt the climate confab.

More:

Why can't terrorists see the importance of Climate Change:

## **The Assault on our Food Chain**

Napoleon once said: "Only a foolish horse fights with his nose bag".

But today we have many foolish people fighting their nose bag. They are weakening Earth's food chain with a war on carbon.

This cartoon may be used freely providing the author's name is retained and the source is acknowledged:

<http://carbon-sense.com/wp-content/uploads/2015/11/party-in-paris.pdf>

Carbon is the building block of life. “Organic” means “containing carbon” and every bit of plant and animal life is built around the carbon atom.

Carbon enters Earth’s cycle of life via plants, which extract it from the rare and precious carbon dioxide plant-food in the atmosphere. Living things use this carbon, plus water, oxygen and minerals, to create the proteins, fats, carbohydrates and skeletons they need.

Plant growth responds quickly to the amount of carbon dioxide in the atmosphere.

See: CSIRO: *Rising Carbon Dioxide causes greening of the deserts:*  
<http://www.csiro.au/en/News/News-releases/2013/Deserts-greening-from-rising-CO2>

*The Biosphere is booming: CO2 is the Cause:*  
<http://wattsupwiththat.com/2008/06/08/surprise-earths-biosphere-is-booming-co2-the-cause/>

However, today’s levels are far below those that sustained the abundant forests, grasslands, wetlands, herbivores and carnivores of past eras.

The biggest long term threat to abundant life on Earth is natural carbon sequestration, especially during the recurring cold dry eras when cooling oceans absorb huge amounts of carbon dioxide from the atmosphere, and growing ice sheets capture most of its water.

Nature is very efficient at carbon capture and burial. Enormous quantities of carbon and hydrogen have been removed from past atmospheres and buried under ancient sediments in extensive beds of coal, oil shale, limestone, marble, dolomite and magnesite, and in diffuse deposits of hydro-carbon liquids and gases. The result is that the carbon dioxide level in today’s atmosphere is not far above the minimum needed to sustain plant life (which is why nurserymen pump more carbon dioxide into their green-houses).

However, in a rare piece of environmental serendipity, man’s extraction and use of coal, oil, gas, limestone and dolomite for power generation, transport, aviation, steel, cement and fertilisers is recycling a tiny part of this storehouse of buried carbon. For example, for every tonne of coal burned, 2.5 tonnes of carbon dioxide plant food plus one tonne of fresh water is added to the atmosphere; and producing one tonne of cement releases about one tonne of carbon dioxide.

See: *The ins and outs of coal combustion:*  
<http://carbon-sense.com/wp-content/uploads/2010/05/coal-burning.pdf>

Every tonne of wheat grown needs a tonne of carbon dioxide just to get the carbon for the grains, and other foods have similar needs. Carbon industries thus help to feed all of Earth’s plants and animals.

See: *Should we celebrate CO2:* <http://www.thegwpf.com/28155/>

Industrial use of carbon-bearing mineral resources also recycles other essential nutrients such as nitrogen, sulphur and phosphorus which are present in variable amounts in coal, oil and carbonates. Any of these by-product gases can be toxic if concentrated in confined spaces, and all of man’s activities can pollute crowded cities, but in the open atmosphere, plant life often suffers because of a deficiency of these key elements.

Those waging a war on hydro-carbons and carbon dioxide are enemies of the biosphere. Their foolish policies like carbon taxes, emissions trading and “Carbon Capture and Burial” are denying essential nutrients to the food chain.

The failed global warming forecasts show that these policies will have no effect on climate, but will reduce the atmospheric supply of food nutrients and fresh water for all life on Earth.

Life is a carbon cycle – don't break the food chain.

## ***What has PM Turnbull Promised to bring to the Paris Party?***

Australian PM Malcolm Turnbull, Foreign Minister Julie Bishop, Minister for Green Energy Greg Hunt and Chief Climate Alarmist, Tim Flannery, plus support staff and media mates are joining the party in Paris.

What have they promised and what more are they planning?

We need to tell them, loudly and often:

***“We will discover exactly what you have done,  
We will expose it,  
and  
We will undo it.”***

## ***Two messages Malcolm Turnbull should have taken to Paris:***

*Trends in Temperature and Sea Levels from my home town, Sydney:*  
<http://carbon-sense.com/2015/11/29/what-message-will-malcolm-turnbull-take-to-paris/>

*What they have not told you about Climate Change:*  
<https://www.youtube.com/watch?v=RkdbSxyXftc>

## ***Thanks:***

*Thanks to those supporters who have sent subscriptions, donations and well wishes. Because of the tough times for most of our supporters, we are also suffering tough times. So if you forgot to respond, it is not too late. Banking details below:*

Viv Forbes,
