

A SUMMARY OF BETRAYAL

The 2030 Agenda: Australian Government invites the UN to control our rights, laws, freedoms, private property, energy use, & life style

Graham Williamson

July 2016

The UN, having spent [more than half a \\$trillion in 70 years](#), is an [undemocratic, unaccountable international policeman](#) that is in the business of [inventing 'global problems'](#) which can only be 'solved' by a transfer of power and money from nation states to the UN. It has been elevated to this status by cooperative national governments. [As noted by Peter Faris QC](#), thanks to the eager cooperation of successive Australian governments "*laws are imported (as some sort of universal truths) from the UN.*"

On 27th September 2015 the UN continued their campaign of global control and undemocratic interference in the affairs of nations around the world with their '[Transforming Our World' 2030 SDG agenda](#) which was [signed by Foreign Minister Julie Bishop](#) on behalf of all Australians. With a predicted [annual price tag of \\$2-3 trillion](#), the agenda is to be sold to the people as 'voluntary', although [the people will be given no choice, and essential provisions will be undemocratically enforced by national governments](#). Although both major Parties refused to mention this during the recent election campaign, implementation of this undemocratic bipartisan supported agenda commenced in Australia on 1st January 2016.

[The 2030 agenda](#) is a UN driven "[master plan](#)" or "[roadmap to global socialism](#)" aimed at controlling the planet, [including so called 'climate change'](#), and the life styles and energy consumption of all people and all countries. [Their 15 year goals include:](#)

- **Redistributing the wealth of Australia and other Western nations, under the control of the UN, to poorer countries, especially impoverished dictatorships, around the world. According to the 2030 Agenda, 'poverty' can only be addressed by undemocratically giving money and power to the UN.**
- **The [COP21 Paris climate change agreement](#), comprising [SDG 13](#), is just one part of the 2030 Agenda. The UN version of climate change though, [is about global power and money](#). As UNFCCC chief [Christiana Figueres pointed out](#), the aim of the UN is to bring about a "*centralized transformation*" "*one that is going to make the life of everyone on the planet very different.*" [Figueres continues](#): "*global society, is moving to the point where we are going to need more and more global governance muscle.....Climate change is only the first of the major, major planetary challenges that we are being given, almost as a playground.....to go into that playground and exercise our global governance capacity*"**
- **Controlling lifestyles, energy use, and consumption by defining which activities are accepted by the UN as being 'sustainable'. Only the UN can control 'sustainability'.**
- **Controlling education around the globe to ensure all children become activists promoting the UN sustainability agenda.**
- **Moving towards global enforcement by developing [global monitoring](#), [accountability mechanisms](#), and surveillance systems so "no one is left behind".**
- **The UN 2030 agenda is completely open ended, stating no total costs, and stating no limits as far as loss of sovereignty and enforcement mechanisms are concerned.**

[The people have been betrayed](#). The 2030 Agenda is all about [betrayal](#), [UN control](#), and [global socialism](#), and [expanding global law](#). The United Nations has "[conned governments, citizens and business into adopting the 2030 Agenda](#)", but "[business does not understand](#)" that it will destroy "[Capitalism and Free Enterprise](#)." And all this has been [made possible by the Australian government](#), and governments of other 'democratic' countries, who invite the UN to interfere in the domestic affairs of their respective countries [WITHOUT the democratic approval of the people](#).

The choice is clear: do you want UN control and interference, or do you want democracy, freedom and prosperity? Should our destiny be decided by us, or by the dictators that comprise the UN? [Do you want democratic Australian laws, or foreign laws dictated by the UN?](#)
