## THE CLIMATE CHANGE DELUSION & THE GREAT ELECTRICITY RIPOFF

Paperback 450 pages approx., \$39.95

ISBN: 9781925501629

How did one of the world's largest exporters of coal, gas and uranium end up with unreliable and expensive energy? Massive subsidies for renewable energy, gaming of the electricity market and government mandates have closed coal-fired generators that previously provided cheap reliable electricity.

Five hundred years ago, Martin Luther objected to indulgences. Today indulgences are sought as subsidies from consumers for renewable energy generators in the name of the environmental religion.

It has never been shown that human emissions of carbon dioxide drive global warming and the recent massive increases in emissions produced no warming.

This book shows that renewable energy creates massive environmental damage and much of the generously-funded climate "science" is underpinned by fraud. The end result is high electricity prices.

However, there is a simple solution to the suicidal energy policy created by pandering to green hysteria that gave us ruinable energy.
